

Smart Card Readers

For Contact Chip & Contactless (NFC) Cards

Readers for iPhone/iPod/iPad

Our smart card readers for iOS devices facilitate user authentication, e-commerce and other secure applications on Apple's iPhone, iPad and iPod Touch.

Readers are available for devices that use both the Lightning connector and the older 30-pin connector. Every reader also includes a micro-USB port, allowing it to be used with a desktop PC, laptop or USB On-The-Go enabled mobile device.

All of our readers for iOS devices are certified to meet Apple's MFi performance and quality standards.

We also offer a range of MFi-certified iPad cases with built-in card readers. These innovative and stylish cases securely hold and protect the iPad without restricting access to the camera and function buttons.

Cases are available for these iPad models:

- iPad Air
- iPads with 30-pin connectors (2nd and 3rd generation)
- iPad Mini (1st and 2nd generation)

Supported Standards

- Compliant with PC/SC, CCID standards
- ISO-7816-1/2/3 T=0 and T=1 protocols
- ISO 7816 Class A, B and C cards
- EMV Level 1
- MFi Certified
- Auto-PPS
